Profile

I am a Computer Science student with a strong foundation in software engineering, backend development, and systems thinking. Passionate about building efficient, secure, and scalable applications, I focus on clean code and solid architecture.
Proficient in PHP, MySQL, Python, and familiar with Laravel, Vue.js, React, and Linux-based environments, I enjoy solving complex problems with elegant solutions. I am a dedicated self-learner, constantly improving my skills and exploring new tools, open-source projects, and concepts in computer science, from algorithms to system design.
I am seeking backend-focused opportunities to contribute meaningfully and grow with a team, building impactful real-world solutions.

TECHNICAL & SOFTWARE SKILLS

- **Front-End Development:** HTML5, CSS3, SASS, Tailwind, Bootstrap, Blade, Vue.js, jQuery

- **CSS Frameworks & UI Libraries:** Tailwind CSS, Bootstrap, SASS.

- **Version Control & Deployment:** Git, GitHub, Netlify, Vercel, GitHub Pages

- **Operating Systems & Environments:** Ubuntu, Fedora, Kali Linux, Parrot OS, Linux Mint (bash scripting, sysadmin basics)

- **Back-End Development:** PHP, Laravel (Routing, MVC, Eloquent ORM, Middleware, Authentication, Blade templating), RESTful APIs

- **Databases:** MySQL, PostgreSQL, SQLite, MariaDB

- **DevOps & Tools:** Docker (basic containerization and usage), Composer, Artisan CLI, Postman, XAMPP, VS Code

- **Programming Languages (Familiar):** Java, C++&C, Python

EDUCATION

B.Sc. Computer Science
Achievers University, Owo, Ondo State, Nigeria | 2021 – 2025

Senior Secondary School Certificate (SSCE)
Isuada Community High School, Owo | 2019 – 2020

Junior Secondary School Certificate (JSCE)
Rufus Giwa Polytechnic Staff Secondary School, Owo | 2014 – 2019

Primary School Certificate
Prince of Peace Nursery & Primary School, Owo | 2008 – 2014

PROJECTS

PHP / Laravel Projects

- **Library Management System** – Built for Achievers University. Tracks books, loans, and student activity.

- **Hospital, Hostel & Exeat Systems** – CRUD-based record systems with secure login, student/staff handling.

- **Plant Keeper** – Tracks plant info, medicinal use. Includes file uploads, validations, and full CRUD.

- **Bible Notes, To-Do, Sniphub, Word Censor** – Niche PHP tools for study, task tracking, and text filtering.

- **Device Info, Password Manager, Poem Keeper,Code Snippet Manager** – Personal utilities showcasing system and UI logic.

- **Command Refs** – Offline tools: Docker Keeper, Linux Keeper, Nmap Helper. – keep commands in tools and help improve workflow(my cheatsheet)

VUE.JS PROJECTS

- **Spanish Words Trainer** – Flashcards app for language learning

- **Quotes App** – Daily quotes pulled from a public API

- **Philosopher Quotes App** – Curated quotes with filtering by philosopher

- **To-Do App** – Interactive task manager with priority tagging

JAVASCRIPT (VANILLA) PROJECTS

- **Weather App, BMI Calculator, Drawing Canvas, Image Editor, Currency Converter, Braille App,Color Pallete Generator,Key codes viewer.**

- **Pomochrono, Palette Generator, Key Code Viewer, Palindrome Checker, Base & Mass Converters**

Link to Some of my Projects:

- *Braille App*

- Vue.js To-Do App

- Spanish Words Trainer

- Philosopher Quotes

- Key Codes Viewer

- Morse Code Translator

- Palindrome Checker

- Color Palette Generator

- Quotes App

- Weather App

WORK EXPERIENCE

Programming Instructor

Leadership Academy, Owo, Nigeria
January 2020 – December 2021

- Taught core web development skills (HTML, CSS, JavaScript, Python) to beginners and intermediate students.

- Introduced learners to foundational programming concepts and logical thinking.

- Guided hands-on sessions to build basic web pages and interactive elements.

- Helped students grasp modern web technologies with a focus on practical application.

Junior Web Developer Trainer (Intern)

Ntech Systems, Nigeria
June 2023 – October 2023

- Assisted in mentoring junior developers on web development fundamentals and project workflows, contributing to a 5% improvement in business and student work outcomes.

- Supported live training sessions on HTML, CSS, JavaScript, and beginner PHP, engaging in hands-on web projects using Bootstrap and version control via Git/GitHub.

- Exposed students to Linux (Ubuntu), helping them learn command-line basics and introducing essential web development security concepts.

- Assisted in setting up workshops and meetings for interns and business associates, fostering collaboration and knowledge sharing

Community Lead (Remote)

ATC Africa
February 2024 – December 2024

- Coordinated community-driven tech events and code-along sessions for beginner devs.

- Promoted open learning, mentorship, and shared resources for aspiring programmers.

- Led discussions on career development, backend trends, and Linux tooling.

Programming Instructor & Intern Web Developer

MTTI (Midas-Tech Training Institute)
June 2024 – October 2024

- Delivered lessons on backend development using **Laravel**, and assisted learners in building CRUD apps.

- Introduced students to secure coding practices and **basic web app penetration testing** techniques.

- Contributed to group projects, helping debug, deploy, and document Laravel-based applications.

- Mentored learners on using **Linux environments (Ubuntu, Kali)** for backend development and testing.

HOBBIES & INTERESTS

- Poetry and creative writing

- Music appreciation

- Walking and quiet reflection

- Chess and logic puzzles

- Blogging and researching tech trends

- Exploring Linux systems and terminal-based tools

- Reading computer science literature

- Studying and self-paced learning

LANGUAGES

- **English**

- **Spanish(Basic)**

- **French(Basic)**

- **Yoruba**
